

1

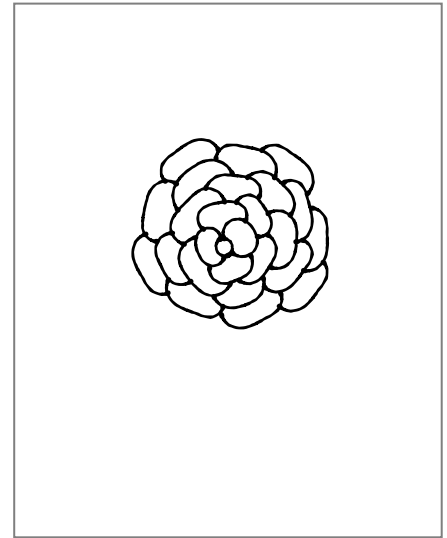

On the board, draw a rectangle to represent the paper.

Draw a small circle in the center of the paper.

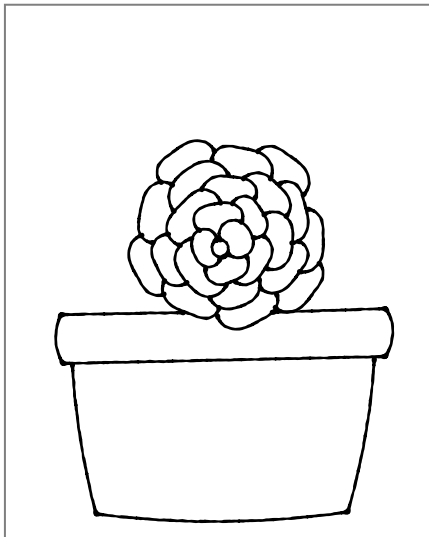

2

Add "C" shapes around the circle. Continue building the succulent outward by adding additional "C" shapes.

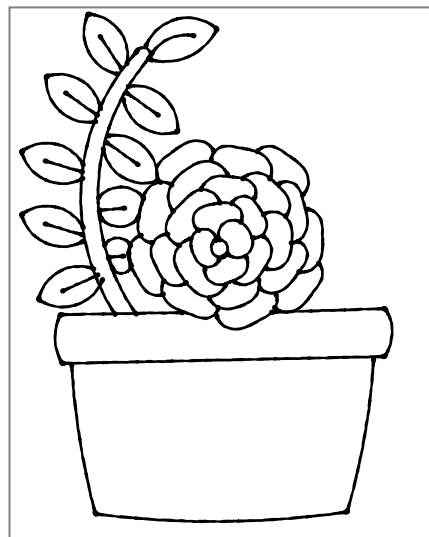

3

Continue adding "C" shapes until the succulent is large and round.

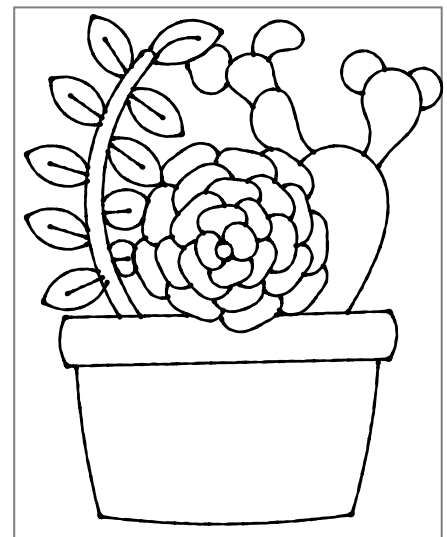

4

Add a long, skinny rectangle under the succulent. The top of the rectangle may be "behind" the succulent. Add two vertical lines and connect them at the bottom to make the pot.

5

Draw a curved line out of the pot. Curve the line and go back to the pot to make a thick stem. Add leaves.

6

For the cactus, draw a large upside-down "U." Stack smaller "U's" on top of the base. Add "X's" on the cactus for its spines. Draw a pattern on the pot. Add additional plants if desired.
